Keep the low temperature in glazed multideck display

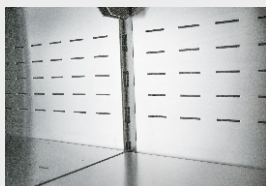

Provide optimal storage conditions for products that are sensitive to temperature fluctuations with glazed multideck refrigerated display.

Dynamic cooling ensures even temperature distribution throughout the chamber, and due to the tempered glass you gain an attractive exposition and safety of your customers and employees.

See how the RCh-SR multideck display supports your sales

You will choose your **energy-saving LED light** to the type of the product that you are selling.

You will easily keep it clean, because the interior and shelves are made of **stainless steel**.

You will mark the products clearly, because we have mounted **edge strip** on shelves where you can put your price tags.

You will ensure optimal storage conditions for your products and keep them fresh and tasty, because we have mounted **glazed sliding door**.

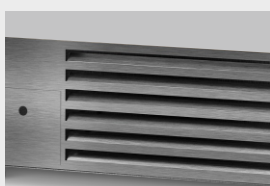

Sides and door made of **double-tempered, low-E glass**, are designed with your safety in mind.

You will easily level the device, because we have applied **adjustable legs**.

You will keep the products fresh longer, due to the effective **dynamic cooling**.

You will gain convenient access to the **condenser**, because the grill is closed with a magnet, which does not require any tools.

You will complete the interior of your store with **front panel**. Choose between painted steel or furniture board.

You can easily set up the best temperature, because we have applied **electronic controller** with a clear display.

STANDARD EQUIPMENT

Refrigerating unit

- 3rd climatic class
- Plug-in unit
- Fan assisted cooling (dynamic)
- Electronic temperature controller with display
- Defrost water collection container

Housing

- Sides made of double tempered, combined, low-E glass
- Plinth made of steel painted in black, grey or white colour
- Sliding, glazed door
- Vent grid lockable with magnet
- Adjustable legs
