Flower vending machines / model AT-K

For over 50 years, we've been perfecting the art of refrigeration. For 30 years, we've been manufacturing reliable cooling equipment. For the past 10 years, we've been designing innovative solutions tailored for florists. With modern self-service sales in mind, we have created an innovative device – the FLOWER VENDING MACHINE, which combines our technological knowledge with the needs of the rapidly growing flower market.

RAPA flower vending machine - technology designed for change

Unlike converted vending machines, the RAPA flower vending machine was created from the ground up with flowers in mind:

- **the largest compartments on the market** - 3-Compartment Module: 510×517×506 mm (with modification, the top compartment can reach up to 588 mm in height) 2-Compartment Module: 517×777×506 mm
- capacity to store premium bouquets, wedding arrangements, and seasonal decorations.
- temperature control in every module – from the cool environment ideal for roses to conditions suited for potted plants.

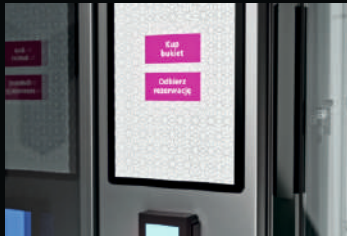

A flower shop open 24/7 – without extra staff

For many flower shop owners, the biggest barrier to growth is the lack of time or staff resources.

The flower vending machine eliminates this problem:

- it sells on holidays, Sundays, and at night
- it operates in multiple locations simultaneously
- it extends the brand's reach without rental costs and additional employees.

Advantages

Your flower vending machine is operated via a 15-inch touchscreen with an intuitive, easy-to-use application.

You get extra-large cooling compartments. The top chamber can reach up to 588 mm in height – perfect for storing even large floral arrangements.

Each cooling module lets you freely adjust the temperature, allowing you to create the perfect conditions for any bouquet — no matter the flower type or season.

The flower vending machine comes standard with tinted side glass panels that protect from weather conditions.

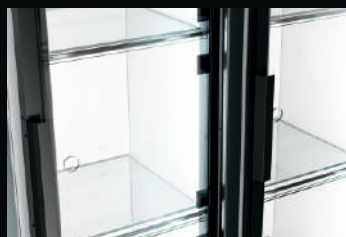

The illuminated display panel can be customized to match your brand colors or personal preferences.

Your flower vending machine can be fully personalized — wrap it with custom graphics designed just for you.

Hinged doors make it easy to place large floral arrangements into the modules.

Each module comes standard with tempered glass shelves, which can optionally be swapped for steel ones.

Customize the interior of your flower vending machine to suit your style. We offer a wide selection of RAL colors to choose from.

Flower refrigerators / model AK i AKM

A cooling cabinet for flowers is an exclusive cabinet in which cut flowers are stored in the most favorable climate for them, allowing them to retain their freshness and charm for a long time.

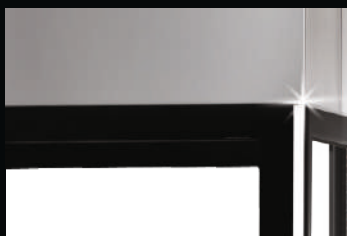

The flower refrigerator combines **versatility and beauty**. Versatility is the **practicality of flowers storage** and beauty is the **precision of the device**, which in a subtle and elegant way brings their charm out. Thanks to the panoramic glass pane, the exhibition art will be a pleasure that encourages to create attractive flower arrangements. By means of standard, installed crossbar, the flower refrigerator is perfect for **presentation of original hanging flower arrangements**. The flower refrigerator has **tempered glass panes** and modern LED lighting that effectively emphasizes the beauty of the exposition.

The flower refrigerator is a creation made with passion for the demanding floristry industry. It is **perfect for florists and flower shops** who want to showcase their talent and creations in shopping malls in an original and modern way.

Advantages

A housing adorned with an elegant floral pattern. Clear and user-friendly electronic temperature controller with a digital display.

All panes made of combined ow-E, double tempered glass.

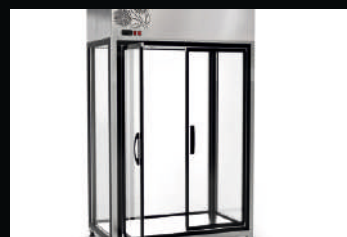

Optional adjustable stainless steel "linen" shelves available for installation.

Flower stools with decorative flower pattern.

Modern LED lighting. Panoramic front glass pane - encourage to create large floral compositions.

Sliding glass doors come as standard, with the option to upgrade to practical hinged doors for additional charge.

Bottom of the storage chamber made of stainless steel "linen" pattern.

In the standard version, you receive adjustable legs. You can replace them with wheels with a brake for an additional charge.

Possibility to install a lock protecting the device against unauthorized access.

CREATE A PARADISE FOR FLOWERS!

FLOWER REFRIGERATORS - extend flower freshness up to 6 times - THE PERFECT PRODUCTS FOR FLORISTS AND SHOPPING CENTERS

width 120,5; 140,5; 160,5;
180,5; 200,5; 220,5 cm
depth 74,5 cm
height 199 cm

Service consulting
directly from
the manufacturer.

We used the **gravity cooling**, which does not dry the air. And due to the perfect temperature, you change the water less often.

You will take care of the environment, because the interior of the device is cooled with **R-290 refrigerant**.

A flower refrigeration **platform** can make it more comfortable to use - both placing as well as removing flowers, and also cleaning the device.

The flower refrigerator is decorated with an elegant floral pattern that will highlight your professionalism.

You can choose the right temperature easily, because we applied an **electronic temperature controller** with clear display.

Choose **interior mirror** instead of panoramic glass and/or side windows and create an effect of abundance.

Choosing the AKM model with a modified body and **adjustable shelf levels, along with shelves containers**, will give you even more display options.

You will easily insert flowers into the device, because we have installed **sliding doors**, which you can block for the time of loading.

All flower refrigerator models are also available in a version with an **energy-saving inverter compressor**, which allows you to **save up to 50% of electricity!**

Model **AKM**

Model **AK** painted housing

Model **AK** with hanging shelves

Model **AK** with a platform for a device

Refrigerated flower counters / model BK

A modern refrigerated device, **dedicated to impulsive shopping, short exposure and storage of flowers**. A flower counter is a self-service device that does not require the presence of a seller. Cascade display and mirror cover, ensures **full exposition of bouquets**. Shape and dimensions enable convenient access to all articles from any side.

Advantages

Cascade exposition made of grinded stainless steel.

Convenient access to the condenser makes it easy to keep it clean.

Electronic temperature controller – clear and easy to use.

Finish of front and sides of the device made of tempered glass.

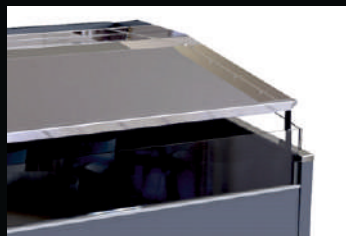

Device allows free placement of 6, 9 or 12 pcs. of containers with diameter of 27 cm.

2, 3 or 4 pcs. of price panels placed on the front of the device.

Set of 4 pcs. of rotary wheels enables easy movement of the device.

Folding device cover.

Inner part of the cover made of „mirror“ stainless steel visually enlarges the exhibition space.

PROVIDE CONVENIENCE FOR YOUR CUSTOMERS!

REFRIGERATED FLOWER COUNTERS - 100% quality within reach - THE PERFECT PRODUCTS FOR SHOPS AND SUPERMARKETS

length 82; 118; 145 cm
depth 95 cm
height of the closed counter 118 cm
height of the open counter 191 cm

Your flowers will remain fresh for a long time, because we used the **dynamic cooling** in the device.

You will take care of the environment, because for cooling we used **ecological refrigerant R-290**.

Service consulting directly from the manufacturer.

Choose from **3 available sizes**.

82 cm 118 cm 145 cm

You will show every detail, because the **mirror cover** and sides made of tempered glass allow you to see every side of the flowers.

You will set up a low temperature quickly, because we used an **electronic controller** with a clear display.

You will easily maintain the **condenser** clean, because you'll get access to it without using it any tools.

You will emphasize the character of your brand because we will paint the counter in the **colour of your choice**.

You will show the prices in a visible place, because on the front we put **panels** for all relevant information.

You can easily set up the counter in any place, because we have equipped it has **4 wheels, due to 2 brakes** the device will stand steadily.

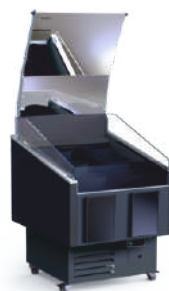

Buckets for flower are not included in the offer.

Gábor Nagy a RAPA Product Ambassador!

Gábor Nagy is a Hungarian florist who creates floral decorations and leads workshops and artistic shows across the country. In 2017, he won the Youth European Championship at the Eurofleurs - floristry competition and earned the title of Hungarian Floristry Champion. In 2022, he took the silver medal at the European Floristry Championships- Europa Cup 2022 in Katowice. The year before, Gábor ordered a flower cooler for flowers from RAPA for his family florist shop.

He came to us seeking a solution to the common problem of quickly wilting flowers faced by many contractors in the floral industry. In 2023, Gábor Nagy became a RAPA Product Ambassador! In 2025, Gábor won 2nd place in the prestigious World Cup Floral Art competition in The Hague, confirming his recognition and status in the global floral community.

"...if you want to throw away fewer flowers, especially in summer, but of course also throughout the year, and you want to buy a useful product that is good for cut flowers and will also decorate your shop, I highly recommend RAPA flower coolers." Gábor Nagy

European Floristry Championships Europa Cup 2022

In 2022, we proudly become official sponsor of the European Floristry Championships – Europa Cup 2022 in Katowice.

The championship title and the prize of a RAPA flower cooler were awarded to Dutch representative Hanneke Frankema. The runner-up was Hungarian florist Gábor Nagy.

Hanneke is an acclaimed florist, having won the Dutch National Floristry Championships in 2018 and the World Flower Cup in Barcelona in 2012.

In 2023, the flower cooler was delivered to Hanneke Frankema's newly built studio, where it ensures the freshness and quality of the flowers stored inside and helps improve the florist's daily work.

National Floristry Competition Romanian Floral Design Cup 2020

The mission of the Romanian Floral Design Cup is to support florists, highlight their value and professionalism – their artistic craftsmanship.

This goal is also in line with RAPA's vision – to create devices that extend and emphasize the beauty of floral compositions, combining practical and aesthetic goals.

Our flower cooler provided the setting for the works of floristry masters.

In the 2020 edition of the competition, Emirhan Sungu from Romania was declared the winner.

We were pleased to fund a flower cooler for him, which will help him spread his wings and open his first florist's shop.
