PROVIDE CONVENIENCE FOR YOURSELF AND YOUR CUSTOMERS

Do you have ready-made flower arrangements and want to sell them quickly in a functional device?

Now fresh flowers are at hand.

The L-BK refrigerated counter is a solution for you, if you give your customers the freedom of choice.

10 benefits to support your business

You will surprise your customers with vivid colours, due to stainless steel cover "**super mirror**".

You can arrange your compositions freely, because we have equipped the counter in **removable segments**.

You will take care of the environment, because for cooling we used ecological refrigerant **R-290**.

You can easily clean it, because the device is made of high quality **stainless steel**.

You will show every detail, because the **mirror cover** and sides made of tempered glass allow you to see every side of the flowers.

You will emphasize the character of your brand because we will paint the counter in the **colour of your choice**.

You will set up a low temperature quickly, because we used an **electronic controller** with a clear display.

You will show the prices in a visible place, because on the front we put **panels** for all relevant information.

You will easily maintain the **condenser** clean, because you'll get access to it without using it any tools.

You can easily set up the counter in any place, because we have equipped it has **4 wheels**, due to **2 brakes** the device will stand steadily.

Combine freedom with savings

Display more and sell in a self-service mode

Place in 6, 9 or 12 containers with a diameter of 27 cm, depending on the chosen size of the counter.

The containers are not part of the offer.

Sell fast with no extra costs

You will save the time of your staff, because your customers will gain convenient access to each bouquet on **3 sides**.

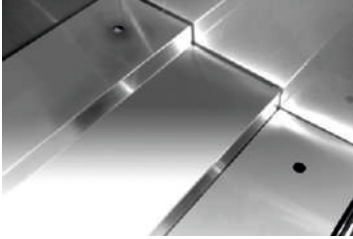

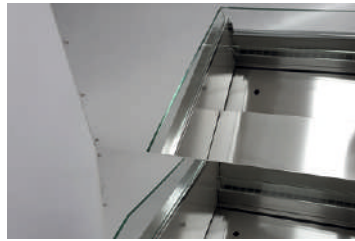

Keep the flowers fresh

Your flowers will remain fresh for a long time, because we used the **dynamic cooling** in the device.

Gain the dedicated space

Choose from **3 available sizes**.

82 cm 118 cm 145 cm

The containers in the photos are not part of the device.

MANUFACTURER OF REFRIGERATION EQUIPMENT

UP TO 2 TIMES LONGER LASTING FRESHNESS OF FLOWERS, which we confirmed with a durability test

For the test, we chose the 3 species of flowers that have not been previously cooled. We put half of them in the counter, the other was kept at room temperature.

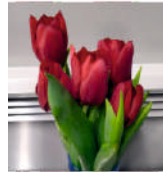

See the photos. This is how the flowers in the counter changed.

Due to the lower temperature, they remained fresh twice as long, compared to the ones that were outside the counter.

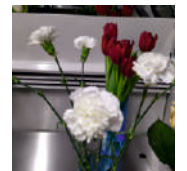

day 01

day 03

day 05

The flowers subjected to the experiment were derived from the same supplier, from one collective package. The water in the tanks was changed regularly and in the same frequencies for each group.
